7,253-11,219 lbs

ENGINE POWER
74HP

OPERATING CAPACITY
2,105-3,186 lbs

COMFORTABLY BETTER.

With side door entry and the largest cabs on the market, JCB skid steers and compact track loaders offer unrivalled comfort for maximum productivity.

INDUSTRY LEADING OPERATOR ENVIRONMENT

JCB cabs are in a class of their own when it comes to operator comfort. Cabs on JCB skid steers and compact track loaders are 33-46% larger than cabs on competing machines.

THE RANGE.

With a wide range of models and attachments, there is a JCB skid steer and compact track loader for every job site and application.

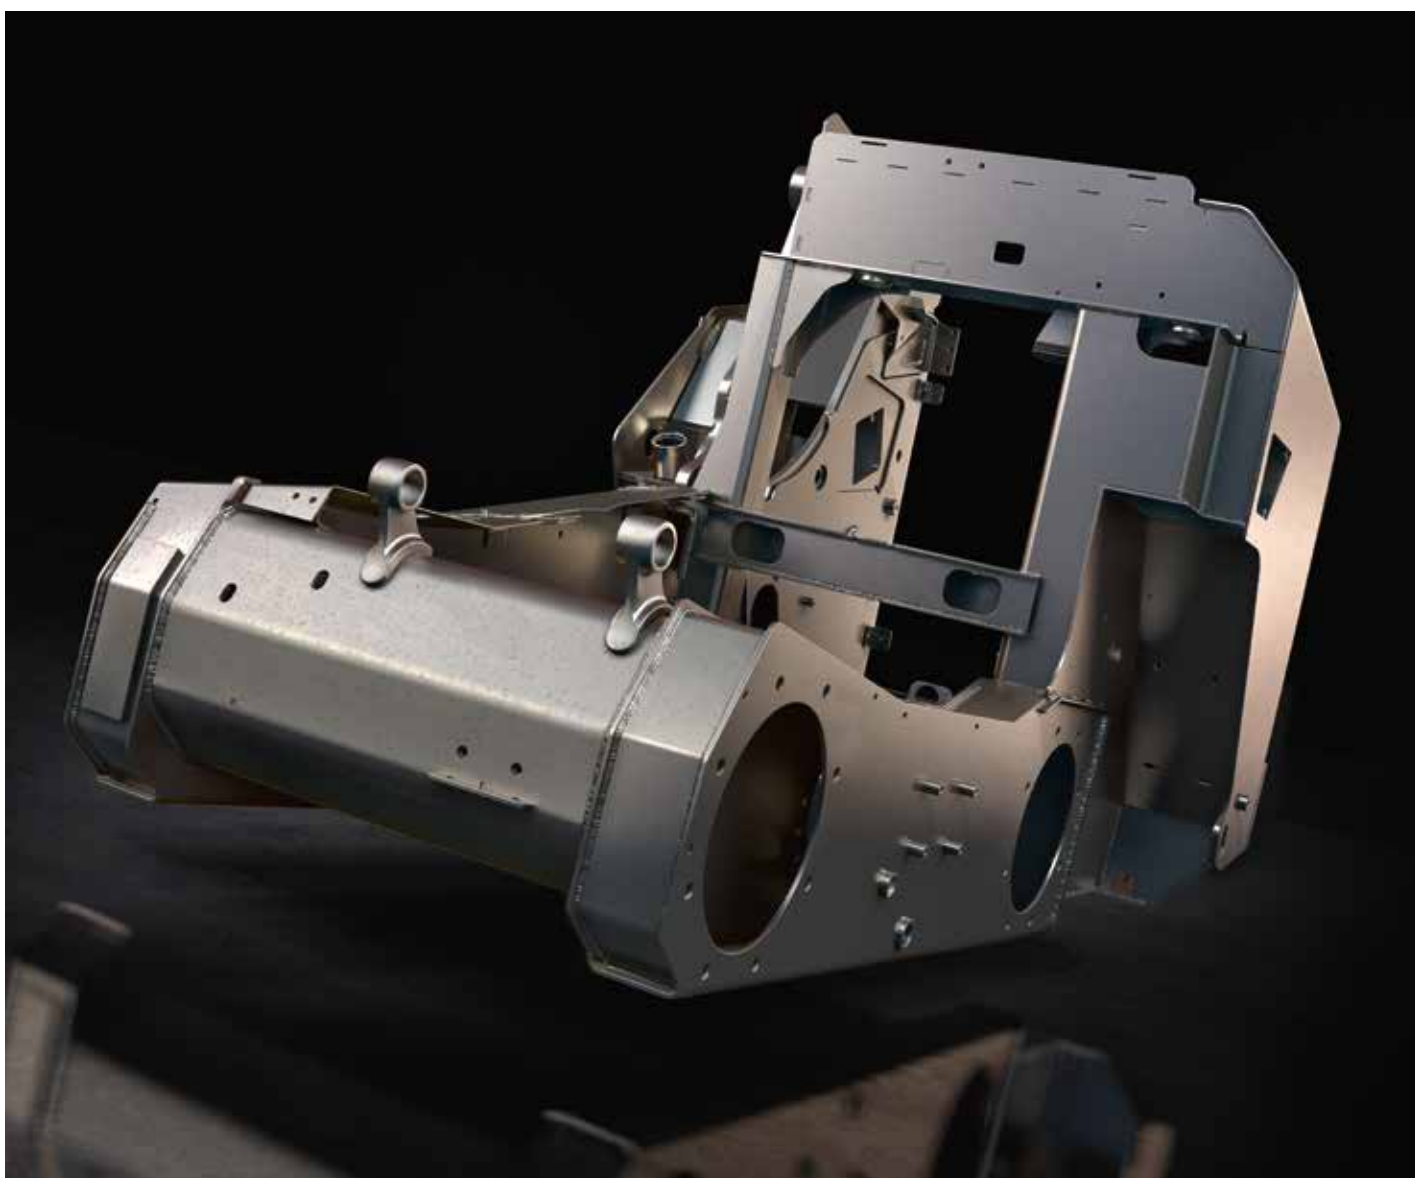

SIX MODELS

Our six models are equipped with a 74hp engine, the iconic Powerboom™ and side-door entry. They deliver the safety and power needed to get the job done.

STRENGTH AND DURABILITY.

JCB has earned its reputation for strength and durability, and JCB skid steers and compact track loaders are built tough to handle any application.

STRUCTURAL STRENGTH

A fully welded chassis provides a rigid structure for maximum strength and reduced weight. A solid undercarriage provides consistent performance on demanding terrain.

POWER AND PERFORMANCE.

With plenty of power and versatile features, JCB skid steer and compact track loaders set new standards for efficiency and productivity.

VERSATILITY

JCB skid steers and compact track loaders feature air conditioning, industry standard quick-hitches, high flow options and counter weight packages.

THE WORLD'S SAFEST.

With a wide opening side door for safe entry and exit, operators no longer need to climb over large attachments. Unrivalled visibility leads to a safer work place.

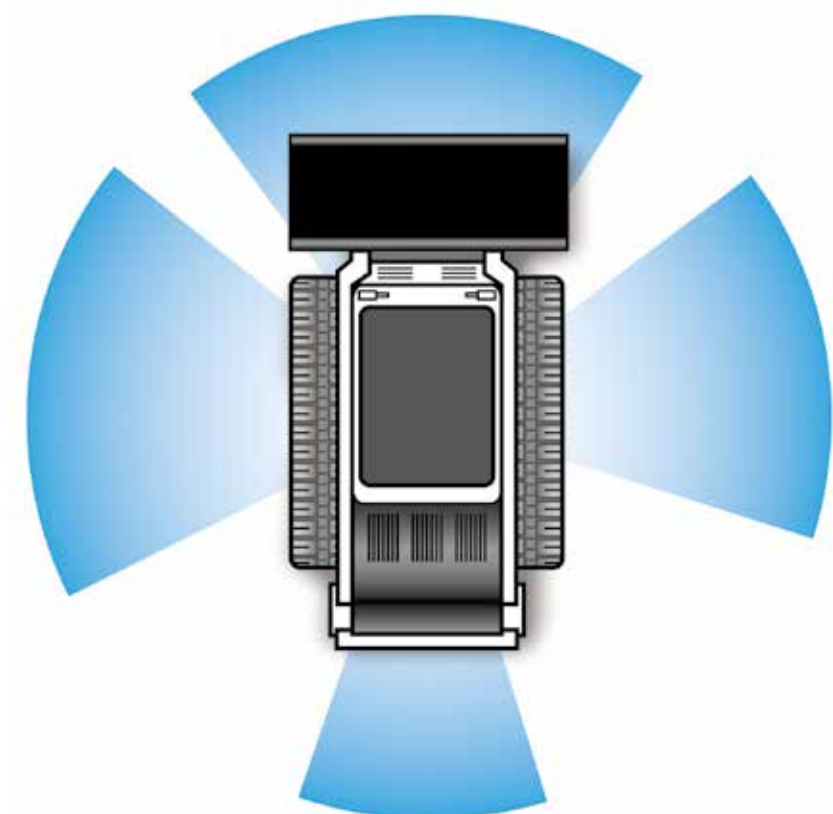

JCB VISIBILITY

ALL AROUND VISIBILITY

Operators of JCB skid steers and compact track loaders enjoy 60 percent better visibility around the machine than users of conventional twin-arm machines.

COMPETITIVE VISIBILITY

A SOUND INVESTMENT.

JCB skid steers and compact track loaders are efficient to use, own and operate. Build quality, fuel efficiency and low costs ensure a high return on investment.

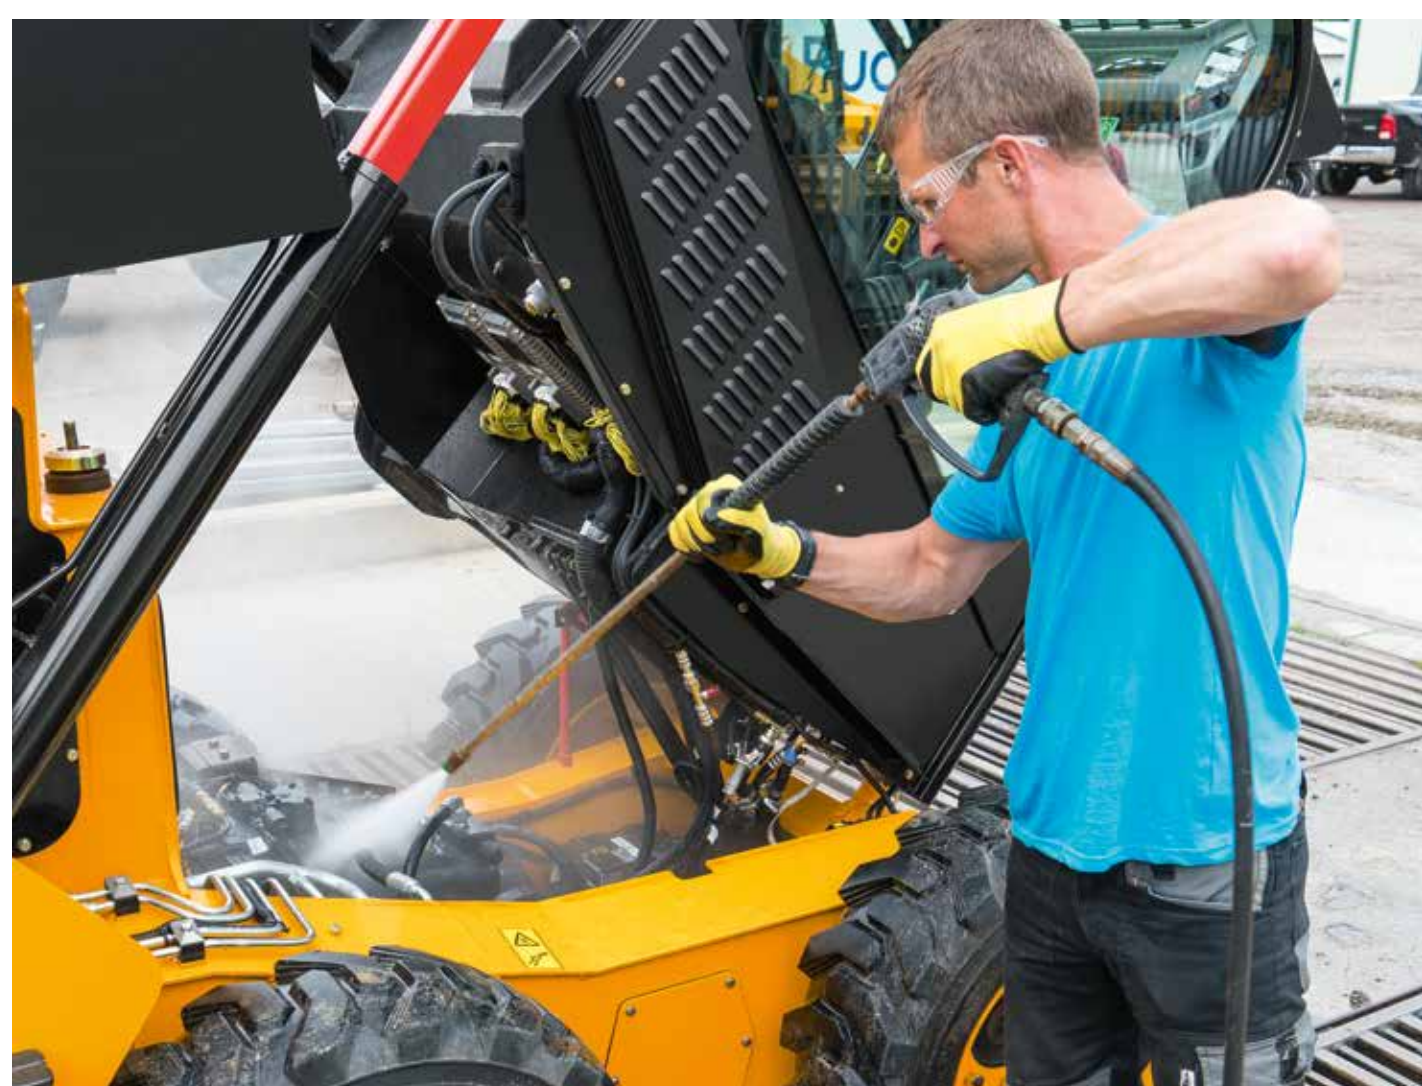

MORE FOR YOUR MONEY

A reversible fan and air scavenge system ensure that debris stays clear of the screen and filters. A belly plate protects the machine from impact damage, and low transport weight makes them easy to move.

SIMPLE SERVICING.

JCB skid steers and compact track loaders are low maintenance and easy to service, making them affordable, efficient and highly productive.

UNRIVALLED SERVICEABILITY

Daily checks and greasing can be performed at ground level, and tilting cabs provide access for more detailed maintenance.

SKID STEER & COMPACT TRACK LOADER | RANGE
